

William Howe

FTS Director, Clayton Utz

William Howe is a highly experienced data analytics professional, specialising in integrating advanced technology solutions, such as AI and machine learning to address intricate legal, compliance and governance challenges. He has specialist expertise in remediation, regulatory data governance, and financial crime compliance and investigations, and supports his clients responding to critical legal issues.

William has been successfully leveraging a range of AI and automation tools to develop bespoke technology solutions that streamline and automate complex legal tasks, provide cost efficiencies, while prioritising risk mitigation.

His experience spans across North America, Europe and Australia where he has supported clients with digital transformation efforts, including automation, regtech, AI and customer analytics. He has previously held Government / National Security roles while working in Canada.
